Trust Deed

Mr. Badrinarayan Chaganlal Baheti

Age: 48 years Occu.- business & social work

R/o. Bhavani Nagar, Parli V. Parli Vainath Dist. Beed

I, Mr. Badrinarayan Chaganlal Baheti today writes on a daily basis as a public prosecutor (Satellor) on 25/06/2015.

I belong to well-cultured family, I am content with the wealth of business that has been achieved by doing honest and hard work in the life of today, and I feel that man is a collective. Therefore, it is necessary for the society in which we grew up and learned that you have to pay a debt, keeping this feeling in mind and keeping some particular activities in mind and working in cooperative spirit.

In today's science and practical life, there is a decline in the number of educational, social, medical, cultural and spiritual problems faced by the society.

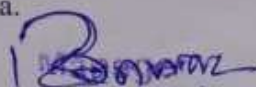

While creating a trusting system, he studied the deep and distant vision of the society and realized that the first step towards the advancement of this society to solve many problems in society, by taking into account the longevity of the society, is to establish a good quality educational institution, social enterprise. The idea is to focus on Rajasthani Charitable Trust and by Parli Vajjanath decided to take the name of the existing Trusts. Accordingly, it is decided that this trust system should work together to organize and organize the family members individually.

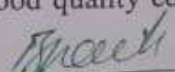

Trusts created that encompasses the spiritual nature of man thinkers secularism. It is also important to work hard in the field of education, social, cultural, religious, art sports. God has given you a good body and knowledge, and, with selfless self-interest, many tasks of social welfare seem to be of great interest to the people at the local level, for the people of the community, the people of the community, the disabled, the day, the weak, the orphans, the disabled.

The establishment of a trust system was noticed that due to this market strategy, young generation is adopting a bad and bad way from ethical quality education and good reason. Therefore, the President is trying to make opportunities available to the disadvantaged, needy and the growing children and girls by setting up educational and social institutions which are morally valued in their untimely areas by keeping the thoughts of the society in good shape.

Those who believe in creating trustworthy systems will find good direction and way for people who go wrong in the wrong way through the initiatives established by them. This will increase people's progress. With the aim of creating a good social order by eliminating the evil tendencies of the society, all the communities have decided to implement the path of many pathways by keeping this objective. Thus, the incompetence of the society, the inability to practice and the inability of tradition will automatically be created and the ideal society will be created.

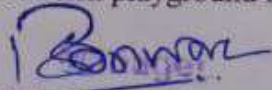

It is believed that creating a trust system is always ready for the overall development of our society, and at the national international level, they are always ready and ready to work. They are also donating Dhan-Dharma to create brotherhood, love, affection, policy, authenticity of all mankind. From the experience of their life till now, it seems that with the objective of being a debtor, we have a strong desire to establish a good quality educational institution in our area.
